

WORKSHEET 4

Harry's granny brought him 10 bars of chocolate for his birthday.

Harry's mother explained to him that he could not eat all the chocolate in one day because he would get sick. Harry waited until his mother was busy in the kitchen and he hid in his bedroom and disobeyed his mother by eating all his chocolate.

After 30 minutes, Harry's tummy started to ache and could not play with his friends. When his mother found out, she punished him and gave him medicine. Harry had to stay in bed for the rest of his birthday.

A **decision** is when you think about doing something and make up your mind act on it.

Harry decided to eat all the chocolate after his mother told him not to eat them all.

An **outcome** is what happens after you make a decision.

Harry started to feel sick after eating all the chocolate.

The **consequence** is the result. This can be bad or good.

Harry got into trouble with his mother, got sick and had to stay in bed for the rest of birthday.

ACTIVITY

Instructions: Write a short story that has a decision made by any character that shows an outcome and a consequence on the space provided on the next page.
